TDISDI

Founded in 1994, International Training, based in Stuart, Florida, USA, is dedicated to instructing scuba divers in technical diving. As the parent company of SDI, ERDI, PFI and First Response Training International, they collaborate globally to deliver specialized certification products.

E-Learning & Certification Body

https://www.tdisdi.com

CLIENT OBJECTIVES

The customer engaged Techno Tackle to enhance and maintain their mobile applications and websites. They needed developers to

- Add new features, fix bugs and improve existing system performance.
- Addressing existing issues and missing functionalities

RESOLUTION

The client requested several enhancements, so we assembled a dedicated technical team. Key features include automated facility registration, report card generation, an improved purchase credit system, and a mobile app with user notifications. We also enhanced course completion, added waivers, and enabled online leadership processing, among other upgrades.

- Addressing and resolving bugs in the existing system and providing ongoing service and maintenance

South West Port

South West Port Limited is a port company within JSW Infrastructure Limited, the ports and maritime logistics arm of the JSW Group. It provides cargo handling and logistics support to JSW Group manufacturing operations, including JSW Steel. The wider JSW Group is one of India's largest diversified conglomerates.

Ports & Maritime Logistics

www.jsw.in

CLIENT OBJECTIVES

The client's IT team approached Techno Tackle in April 2026 for contract technical resources to support an in-house application.

- PHP full stack developers with MVC, MySQL and REST API skills.
- Application development, customisation and performance work.
- Day-to-day support, defect resolution and root cause analysis.

STAFFING SOLUTIONS IN ACTION

Two developers were deployed onsite at the client's Ennore, Chennai office in May 2026, under an 18-month purchase order.

- Every candidate technically screened before reaching the client.
- Shortlisted profiles submitted within three business days.
- A named contact tracks performance through every review point.

BIZ2CREDIT

Biz2Credit is an online financing platform that provides direct funding to small businesses across the U.S. Known for its diverse financing products and resources like BizAnalyzer and the Small Business Lending Index, the company is also a member of the Innovative Lending Platform Association (ILPA).

Financial Services

www.biz2credit.in

CLIENT OBJECTIVES

Biz2X, developed by Biz2Credit, is an advanced platform designed for banks to manage online lending with tools for loan processing. The client urgently needed over 50 experts in various technologies to customize Biz2X for bank requirements. TechnoTackle was approached to provide skilled resources quickly and the contract duration ranges from six months to two years.

STAFFING SOLUTIONS IN ACTION

Our dedicated contract hiring team worked closely with the client to meet their hiring needs. We sourced and pre-screened candidates, using Xobin for technical assessments and successfully onboarded 30+ candidates from over 250 profiles shared within three months.

- Team assisted the client in onboarding candidates. Additionally, the team supports the relieving process on the candidate's last working day.
- Networking and Sourcing

1851 Franchise

1851 Franchise is a globally recognised digital publication dedicated exclusively to the franchising ecosystem. The platform educates aspiring franchise owners, supports franchisors and connects brokers, consultants and investors through editorial content, brand storytelling and industry insights.

Franchise Media & Digital Publishing

www.1851franchise.com

CLIENT OBJECTIVES

The client needed more than developers. Without a deep technical background, the publisher needed a partner who could:

- Provide clear technical direction and identify gaps proactively.
- Improve platform performance and reduce hosting costs.
- Communicate in a way that kept him in control of the product.

RESOLUTION

Techno Tackle stepped in as the end-to-end technology partner across design, development, QA and ongoing maintenance.

- A dedicated cross-functional team of five in Agile sprints.
- Next.js frontend, Laravel and Node.js backend, Yii support.
- Multi-provider authentication and role-based database access.
- Ongoing advisory on their digital marketing and SEO campaigns.

Kovai.co

Kovai.co is a UK-headquartered software product company with a major development centre in Coimbatore, India. It builds enterprise software and B2B SaaS solutions for businesses worldwide, serving over 2,500 global customers across three product lines.

SaaS & Enterprise Software

www.kovai.co

CLIENT OBJECTIVES

As Kovai.co expanded its product development, it needed experienced frontend engineers faster than traditional hiring allowed.

- Skilled developers with specific technology expertise.
- The ability to scale engineering teams with project demand.
- Professionals who could integrate with existing teams.

STAFFING SOLUTIONS IN ACTION

We combined our in-house talent pool with a nationwide vendor network, so the client received technically screened professionals.

- Shortlisted profiles submitted within three business days.
- Every candidate internally screened before submission.
- Deployed fully onsite at the Coimbatore development centre.

Compass Tex

Compass Tex is a global supplier of fashion innovation, operating across India, Germany, Turkey, Bangladesh, Vietnam and Australia. A leading innovator in circular knit fabrics, it provides end-to-end services from concept and design through to production and logistics.

Garments Manufacturing & Supply

www.compasstex.com

CLIENT OBJECTIVES

The client approached Techno Tackle to extend and enhance the ERP application that runs their business from order intake to shipment.

- New features and bug fixes as the business needs evolved.
- Enhancements across the full order-to-shipment workflow.
- Ongoing support and maintenance for their applications.

PROPOSED SOLUTION

We studied the existing ERP and delivered the work as change requests and fixes, and are now extending it to mobile and voice.

- Dashboard restructured around leads, orders and activities.
- Flexible order edits, proforma invoices and pack audit reports.
- Role-based calendar, manual to-do tasks and Outlook reminders.
- A React Native mobile app, with AI voice capture in build for QC.

Symphony

Symphony Furnishings is a 28-year-old curtain and furnishings brand based in Coimbatore, Madurai and Chennai, offering premium fabric collections for residential and commercial interiors through in-house design teams and external interior architects.

Interior Furnishings & Home Décor

www.symphonyfurnishings.com

CHALLENGES WITH LEGACY PROCESS

Symphony ran entirely on manual processes, with no way of knowing which fabrics a client might choose before a visit.

- No digital tool in selection and no central client record.
- No appointment tracking and no management reports.
- Catalog logistics that were costly on every single visit.

PROPOSED SOLUTION

Techno Tackle designed and built the Symphony Fabric Selection Portal from the ground up, across 13 modules and two portals.

- Prompt-based fabric selection across 4,000+ designs.
- A per-appointment catalog checklist replaces blanket transport.
- Real-time project and appointment reporting for every firm.

KRISHNA BHAVAN

Krishna Bhavan Foods, established in Trichy in 1989, is a leading instant food manufacturer in South India, offering over 200 products.

FMCG

www.krishnabhavanfoods.co.in

CHALLENGES WITH LEGACY SYSTEMS

When Krishna Bhavan approached Techno Tackle, they sought to improve their legacy order and customer management processes.

- The legacy process was slow and inefficient, with manual order-taking and challenges in tracking inventory, sales data, and representative performance.

PROPOSED SOLUTION

The Krishna Bhavan requested an application to streamline their order, customer and representative management.

- Techno Tackle developed a mobile app to modernize their outdated process.
- The app includes modules for order management, sales review, customer, representative and scheme management.
- This solution provided accurate data and improved tracking for management and executives.

I would strongly recommend TTSS to any mid-sized business considering a digital transformation, purely due to their ability to understand the requirements precisely and strong intention to meet it 100%.

Palaniappan SN, Consultant, Krishna Bhavan Foods Pvt Ltd.

Shri RAK Jewellers

The client runs a gold jewellery manufacturing business, turning raw gold into beautiful jewellery. They sell their products in their own stores and through other retailers, offering unique and custom jewellery for both individuals and shops.

Jewellery Manufacturing

Bazzar Street, Coimbatore

CLIENT OBJECTIVES

Rak Gold Jewelers faced inefficiencies and errors with manual record-keeping, causing operational challenges. They turned to Techno Tackle to digitize their business processes and streamline operations.

RESOLUTION

To address Rak Gold Jewelers' inefficiencies with their paper-based system, we developed a comprehensive digital solution using distinct admin panels and mobile application.

- Admin panel features include management of inventory, orders, maintenance, and employee details, along with billing, barcode creation and stock tracking ,time tracking and vendor management.
- Mobile application features include barcode scanning, jewelry detail entry, remark addition and customizable order list access.

We needed software to grow, but freelancers never delivered anything our team could use. Techno Tackle built simple, intuitive software that even our skilled labourers picked up easily. Seven years and nearly ten projects on, their support has been seamless.

Balram, Partner, Shri RAK Jewellers.

FUTURISTIC SCHOOL

Founded in 2015, Futuristic School has become a leading EdTech provider with a SaaS-based ERP solution, widely adopted by schools in Punjab and in a few places across India. Over 150,000 students use their product, and the business continues to grow with the expanding SaaS market.

SaaS based ERP solution.

www.futuristicschools.com

CLIENT OBJECTIVES

The client partnered with Techno Tackle to turn their EdTech idea into a platform that streamlines school management for students, parents, and administrators. Techno Tackle successfully developed the application, now used by over 100 schools.

RESOLUTION

We developed a platform with comprehensive features to streamline school management across various functions. Our team continues to maintain it, implementing new features and addressing bugs within the agreed SLA.

- Admin: Manages user roles and access.
- Staff: Tracks attendance, generates reports and communicates with parents.
- Parent & Student: Provides profiles, fee payments and exam results.
- Non-Teaching Staff: Manages the library, visitor logs and bus tracking.

ABOUT US

Techno Tackle Software Solutions is an IT services company based in Coimbatore, India. For eleven years we have built software and supplied engineering talent to clients across India and overseas.

We work in two ways. We place technically screened engineers inside your team through staff augmentation and managed offshore teams. And we design, build and maintain complete applications, from web and mobile products to industry ERPs and generative AI systems.

Our information security management is certified to ISO 27001:2022, and our client reviews are published and verifiable on Clutch and Google.

WHAT WE DO

- IT staff augmentation
- Managed offshore teams
- Custom software development
- Web and mobile app development
- Generative AI and agentic systems
- E-commerce development
- UI/UX design services
- QA and testing services
- Application maintenance and support
- Industry-specific ERP products
